

ALEC XANDER ESPALDON

Davao City, Philippines

alecxanderespaldon21@email.com github.com/alecxander567 [portfolio](#)

Education

St. Peter's College of Toril, Inc.

Bachelor of Science in Information Technology

Aug 2023 – March 2027

Davao City, Davao Del Sur

Relevant Coursework

- Data Structures & Algorithms
- Database Management Systems
- Object-Oriented Programming
- Event-Driven Programming

Projects

Activity Record Attendance System | *Python, FastAPI, TypeScript, React*

Jan 2026

- Built a web-based attendance system integrated with ESP32 and fingerprint authentication hardware.
- Designed RESTful APIs to bridge the frontend and biometric device, handling real-time data securely.
- Modeled the database schema to support multi-user enrollment, logging, and reporting.
- Deployed frontend on Vercel and backend on Render for continuous availability.

BuildFlow | *Next.js, Firebase, TypeScript, React*

Apr 2026

- Built a full-stack project management platform for daily planning, progress tracking, and collaboration.
- Implemented starred projects and community features backed by Firestore for real-time data sync.
- Deployed the application on Vercel, handling cron jobs and profile management workflows.

SpendTracker | *PHP, Laravel, Blade, Bootstrap*

Mar 2026

- Developed a personal finance web app for tracking incomes, budgets, and expenses.
- Built dynamic dashboard views for expenses and wishlists using Laravel and Blade templating.
- Deployed via Docker on Render with a PostgreSQL backend, resolving HTTPS and proxy configuration issues.

Experience

Full-Stack Developer (Academic & Personal Projects)

2024 – Present

Independent Developer

Remote

- Consistently shipped full-stack web applications across academic and personal projects, applying industry-standard practices end-to-end.
- Worked across the full stack using React, Django, FastAPI, and Node.js; integrated cloud services including Supabase, Cloudinary, Render, and Vercel.
- Collaborated on a capstone project as the sole full-stack developer, delivering a production-ready biometric attendance system on time.
- Independently scoped, designed, and deployed multiple projects — managing architecture, version control, and deployment without supervision.

Technical Skills

Languages: Java, C#, JavaScript, Python, TypeScript, PHP, C++

Frontend: React, Next.js, React Native, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Django, FastAPI, Spring Boot, Laravel

Databases: MySQL, PostgreSQL, MongoDB, Firebase, Supabase

Tools: Git, GitHub, Postman, Figma, Render, Vercel, Docker, Bash

Extracurricular

Self-Directed Learning

2024 – Present

Software Development

Remote

- Consistently building full-stack web applications to strengthen software engineering skills.
- Studying system design, API architecture, and cloud deployment patterns through hands-on practice.
